Future Processing

AI PoC Development Framework

Prepare

Assess

Implement

Needs and goals assessment

Data verification and preparation

- Verification whether **existing data is of sufficient quality** and is accessible
- Identification of **risks we may encounter** while working with existing data
- Identification of **infrastructure challenges** for the solution
- Identification of **other possible uses** of the existing data

Policy & compliance assessment

- Verification of **ethical risks** and their mitigation
- **Change management**
- Legal **verification**

Adjusting PoC and metrics expectations

PoC delivery

- Measurement of the new **process/ solution**

Results verification

- Comparison of **the results:** before and after **the PoC**
- Verification of the **quality of the results**

Roadmap

Change management
